

# VT Cantab Global Equity Fund 'C' Class

Factsheet - March 2025  
All data as at 28 February 2025

## Investment Objective / Policy

The investment objective of the Fund is to provide income and capital growth over the long term (5 years +).

The Fund aims to achieve this objective by investing at least 80% in a diversified portfolio of shares in companies in any geographical location. The Fund may also invest in other transferable securities such as government bonds and corporate bonds, collective investment schemes (including those managed or operated by the ACD), money market instruments, deposits, cash and near cash. Derivatives (that is sophisticated investments linked to the rise and fall of one or more underlying assets) may be used for efficient portfolio management purposes.

It is expected that the portfolio will be relatively concentrated (typically around 30-39 stocks). The Fund seeks to generate income and capital growth with a robust and disciplined investment process that focuses on investing in companies typically offering an attractive combination of growth, profitability and stability and holding them for the long term (5 years +). Companies involved in industries such as the production of fossil fuels, alcohol and tobacco, gambling or armaments are excluded from the investment universe.

## Important Information

Risk warning: The value of investments and the income therefrom is not guaranteed and can fall as well as rise due to stock market and currency movements. When you sell your investment, you may get back less than you originally invested. The value of overseas securities will be influenced by the rate of exchange which is used to convert these to sterling. The opinions expressed herein are those of Cantab Asset Management Ltd and should not be construed as investment advice. Past performance is not a guide to future performance.
